

SEEKING HIDDEN MEDIIEVAL BUILDINGS

Gloucestershire Dendrochronology Project: Tewkesbury

Tewkesbury contains a cluster of some of the best surviving, timber frame buildings in Gloucestershire. To help increase public understanding of this rich heritage and to map the chronology of early development, the Gloucestershire Dendrochronology Project has secured Heritage Funding to record and precisely date a number of buildings in Tewkesbury, through tree-ring dating.

Owners of buildings containing large oak timbers in Tewkesbury that might be interested in having their buildings included in this unique project are invited to contact Dr Andy Moir (GBRG Chairperson) at the address below.

To find out more through lectures, workshops, or as a volunteer, please see further details on our project that will run through 2020 at: www.timber-framed.com.
